SAKE

Sake refers to the alcoholic fermented rice beverage from Japan, it is made from rice which has been 'polished' down to remove the outer layer of each grain, exposing its starchy core which in turn produces cleaner, pristine more aromatic sake. The higher the polish the purer and cleaner the sake will taste. Sake has special designations, junmai (pure rice) and ginjo (special brew). These designations refer to the calibre of that particular sake. Ginjo is premium sake that uses rice that has been polished to at least 60% whereas Daiginjo is super premium sake (at least 50%). Sake is enjoyed before, during or after a meal.
