Beers are served cold and in the can or bottle, and are all reminiscent of your last summer holiday. Wines are focused and international, hopping from China to Spain and Back.

SETTING THE ATMOSPHERE

Our music is warm and tropical and, as the night gets later, the music gets louder and the underwater dance floor really gets a steamy workout.

We have great live music and DJ options, perfect for every type of function. We can organise anything from an Elvis impersonator to a death metal band and have the equipment and the experience to ensure we get the best from each.

We have a host of experienced DJ's with the necessary qualifications to get the guests dancing. From pop and EDM to soul and reggae we can arrange something to fit your theme or taste. Alternatively we have a state of the art facilities to host your very own live music and talent. We have a very flexible stage and back of house music system, coupled with an impressively powerful speaker setup. We have the gear and the experience to make your night one to remember.

A vibrant tropical collage background. On the left, there are pink and blue flowers, a yellow banana, and a green leaf against a red and orange background with gold glitter triangles. On the right, a woman's back is visible wearing a blue strapless top and a colorful floral bikini bottom, with a white patterned fabric featuring colorful abstract shapes and a gold glitter band.
